Journal of Non-Crystalline Solids 71 (1985) xi–xiii
North-Holland, Amsterdam

CONTENTS

Editorial *vii*

Committees *viii*

Kreidl, N., Epitome 1

Section I. Thermodynamics
(Chairman P.J. Bray)

Cooper, A.R., Continuous cooling from a high initial temperature through a freezing-in transition 5

Kerner, R., Geometrical approach to the glass transition problem 19

Gupta, P.K., A generalized theory of compositional changes and structural relaxation in amorphous materials 29

Yasui, I. and H. Inoue, Molecular dynamic simulations of changes in structure in ZrF_4 based glasses 39

Section II. Reduction oxidation effects
(Chairman R.J. Araujo)

Brückner, R., Redox ratio shifts and electrical transport properties in redox pairs containing glasses 49

Schreiber, H.D. and G.B. Balazs, An electromotive force series for redox couples in a borosilicate melt: the basis for electron exchange interactions of the redox couples 59

Baltă, P., C. Spurcaciu, D. Radu and O. Dumitrescu, The influence of the melting conditions on the basicity of glasses 69

Section III. Structure and diffusion
(Chairman W. Nelson)

Frischat, G.H. and W. Beier, Influence of preparation conditions on diffusion in glasses 77

Revesz, A.G. and H.L. Hughes, The structure of thermally grown noncrystalline SiO_2 films on silicon 87

Magruder, R.H., D.L. Kinser and R.A. Weeks, Fusion temperature effects on the annealing behavior of GeO_2 glasses as measured by the dc resistivity 95

Sales, B.C., M.M. Abraham, J.B. Bates and L.A. Boatner, Structural properties of lead–iron phosphate glasses 103

Section IV. Electronic states of defects
(Chairman G.E. Rindone)

Davis, E.A., Defects and associated electronic states in amorphous semiconductors 113

Dutt, M.B. and D.E. Day, Origin of thermally stimulated currents in oxide glasses 125

0022-3093/85/$03.30 © Elsevier Science Publishers B.V.
(North-Holland Physics Publishing Division)

Friebele, E.J., D.L. Griscom and M.J. Marrone, The optical absorption and luminescence bands near 2 eV in irradiated and drawn synthetic silica 133

Section V. Chalcogenides; ion implantation
(Chairman E.J. Friebele)

Shimizu, T., Nature of defects in amorphous Ge–S and Si–N 145

Kordas, G., R.A. Weeks and D.L. Kinser, Paramagnetic conduction electrons in GeS_x-glasses 157

Holland, O.W., D. Fathy, J. Narayan, T.P. Sjoreen and S.R. Wilson, Optimized conditions for the formation of buried insulating layers in Si by high dose implantation of oxygen 163

Section VI. Sol–gel processes
(Chairman S. Sakka)

Brinker, C.J., E.P. Roth, G.W. Scherer and D.R. Tallant, Structural evolution during the gel to glass conversion 171

Rabinovich, E.M., Alkoxide and colloidal silica gels and glasses: a comparison 187

Freund, F., Conversion of dissolved "water" into molecular hydrogen and peroxy linkages 195

Section VII. EXAFS and structure
(Chairman A.C. Wright)

Greaves, G.N., EXAFS and the structure of glass 203

Antonini, M., A.E. Merlini and R.F. Thornley, EXAFS structures of technetium in glasses prepared under different redox conditions 219

Araujo, R.J., The influence of quenching on the color of certain glasses containing copper 227

Section VIII. ESR spectra
(Chairman G. Kordas)

Kawazoe, H., Effect of modes of glass-formation on structure of intrinsic or photon induced defects centered on III, IV or V cations in oxide glasses 231

Yoko, T., K. Kamiya and S. Sakka, Oxidation state of copper ions in silicate glasses prepared by different methods 245

Sammet, M. and R. Brückner, Optical absorption and electron spin resonance in vanadium-containing phosphate and fluoride phosphate glasses 253

Hosono, H., Y. Abe and H. Kawazoe, ESR study of radiation induced paramagnetic defect centers localized on a phosphorus in binary phosphate glasses 261

Section IX. Thermal effects on equilibria
(Chairman A.R. Cooper)

Paul, A., Effect of thermal stabilization on redox equilibria and colour of glass 269

Watanabe, Y., T. Kanazawa and H. Kawazoe, Structure of radiation-induced ESR centers in nitrogen-containing phosphate glasses 279

Section X. Raman and ESR spectra
(Chairman J.Hurt)

Mittl, J.C., R.L. Tallman, P.V. Kelsey Jr and J.G. Jolley, HIP Glassmaking for high nitrogen compositions in the Y–Si–Al–O–N system 287

Wright, A.C., R.N. Sinclair and A.J. Leadbetter, Effect of preparation method on the structure of amorphous solids in the system As–S 295

Davé, S. and R.K. MacCrone, Magnetic properties of sol–gel glasses containing titanium ions 303

Sakka, S., S. Ito and K. Kamiya, Electronic spectra of transition metal ions in gel-derived and melt-derived glasses 311

Mukherjee, S.P. and S.K. Sharma, A comparative Raman study of the structures of conventional and gel-derived glasses in the SiO_2–GeO_2 system 317

Section XI. Thin films and sol–gel process
(Co-chairmen F.J. Bonner, M.N. Roilos)

Kordas, G., R.A. Weeks and L.C. Klein, Electron-spin-resonance (ESR) study of sol–gel glasses 327

Châtelain, A., Ph. Buffat, P. Stadelmann and R.A. Weeks, Precipitation of small iron particles in amorphous silica: ferromagnetic resonance experiments 335

Wolf, A.A., E.J. Friebele and D.C. Tran, EPR spectra of gel-to-glass reactions 345

Friebele, E.J., D.L. Griscom and T.W. Hickmott, Nitrogen-associated paramagnetic defect centers in sputtered SiO_2 films 351

Bonner, F.J., G. Kordas and D.L. Kinser, Sol–gel glasses by non-aqueous processes 361

Section XII. Raman spectra in melted and sol–gel glasses
(Chairman C.J. Brinker)

Galeener, F.L., Raman and ESR studies of the thermal history of amorphous SiO_2 373

Seebaugh, W.R., D.L. Kinser, R. Hoff and R.A. Weeks, Cooling and crystallization rates of Libyan Desert Glass 387

Wang, C. and Y. Tao, The influence of boron ion-implantation on silica and lead glasses 397

Sharma, S.K., J.A. Philpotts and D.W. Matson, Ring distributions in alkali- and alkaline-earth aluminosilicate framework glasses – a Raman spectroscopic study 403

Section XIII. NMR, ESR and Raman spectra
(Chairman D.E. Day)

Bray, P.J. and E.J. Holupka, The potential of NMR techniques for studies of the effects of thermal history on glass structure 411

Kushiro, I., S.K. Sharma and D.W. Matson, Effect of high pressures on the structure of anhydrous and hydrated GeO_2 glasses 429

Weeks, R.A., Some effects of pulsed CO_2 laser heating of silica 435

Silin, A.R. and L.N. Skuja, Intrinsic defects in fused silica 443
